

# SAI ABHI CHANDRA MUCHHAKARLA

Bhimavaram, Andhra Pradesh, India | +91-7794080711 | abhimuchhakarla@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

AI/ML professional with hands-on experience in data annotation, ground truth generation, and quality verification across image, audio, and text modalities. Skilled in following defined instructions and SOPs, maintaining high accuracy and productivity standards, and applying strong English grammar and language proficiency to text-based tasks. Combines this with a technical foundation in machine learning, data analysis, and Microsoft Office tools to support ML data processing pipelines.

## CORE SKILLS

- Data Operations: Data Annotation, Ground Truth Labeling, Data Capture, Quality Audits & Verification, SOP Adherence, Task Tracking & Status Reporting, Escalation Handling
- Modalities: Image Annotation, Video Annotation, Audio Annotation & Evaluation, Text Annotation & Transcription
- Languages & Compliance: English (fluent, read/write/speak), Grammar & Syntax Review, Telugu, Data Confidentiality & Compliance
- Programming: Python, C, Java, C++
- Frameworks/Tools: HTML & CSS, Bootstrap, Node.js, MySQL, Scikit-Learn, TensorFlow, PyTorch, Microsoft Office (Excel, Word, PowerPoint)
- Visualization: Tableau, Power BI, Matplotlib
- Soft Skills: Problem-Solving, Team Collaboration, Project Management, Attention to Detail, Flexible Scheduling

## RELEVANT EXPERIENCE

### Data Annotation & Quality Analyst (Crowdsourced/Freelance) — *Remotasks*

2025 – Present

- Performed image and UI element annotation for the ScreenSpot Pro pipeline, following detailed labeling guidelines and defined instructions to produce accurate ground truth data for ML model training.
- Completed audio evaluation and speech-to-speech (S2S) qualification tasks, applying strict quality and accuracy criteria under project-specific SOPs.
- Executed transcription and language-proficiency tasks (GoTranscript, Telugu), applying grammar, syntax, and linguistic rules to ensure high-quality text output.
- Tracked task completion status against daily productivity and quality targets, and reported progress accurately using recommended tools.
- Raised task-related queries and failures through established channels and closed them within defined timelines to maintain workflow quality.
- Maintained strict confidentiality and compliance with data handling standards across all annotation projects.

### Full Stack Web Developer Intern — *NXT Wave*

Jan 2023 – Jun 2023

- Built two dynamic web applications leveraging the MERN stack, working within defined project instructions and timelines.
- Automated web data collection through software tools and custom scripts, streamlining repetitive data-processing tasks and improving accuracy.

## MACHINE LEARNING PROJECTS

### AI-Driven Sales Forecasting & Demand Analysis — *Personal / Published Research*

Feb 2025 – Present

- Curated, cleaned, and verified sales datasets to ensure accurate ground truth inputs before model training.
- Developed an AI-based predictive model to forecast product sales and analyze customer demand trends using Python and machine learning algorithms.
- Technologies: Python, TensorFlow, Scikit-Learn, Pandas, NumPy, Matplotlib, Power BI.

### Early Prediction & Detection of Pneumonia (CNN + Random Forest) — *Personal Project*

Jan 2024 – Mar 2024

- Curated and verified chest X-ray image datasets, applying quality checks to ensure accurate ground truth labels prior to model training.
- Combined CNN-based image analysis with Random Forest classification to achieve 95% detection accuracy.
- Technologies: TensorFlow, Keras, OpenCV, Scikit-Learn, Python, CNN, Random Forest.

### Traffic Sign Recognition Using CNN — *Personal Project*

Aug 2024 – Nov 2024

- Labeled and verified a multi-class traffic sign image dataset to support accurate model training and evaluation.
- Achieved 96% accuracy with a CNN-based deep learning model for real-time traffic sign identification.

- Technologies: TensorFlow, Keras, OpenCV, Python, CNN, Scikit-Learn.

## PUBLICATIONS & PATENT

---

- Muchhakarla, S. A. C., & Kaur, N. (2025). AI-Driven Sales Forecasting and Demand Analysis for Optimizing Product Manufacturing in Marketing. IEEE IETACS 2025.
- Muchhakarla, S. A. C., & Kaur, N. (2025). Analyzing the Effectiveness of Machine Learning Approaches in Sentiment Classification. IEEE IETACS 2025.
- Patent: Integrated Hardware-Software System for Explainable AI in Sales Demand Forecasting and Manufacturing Decision Support (Application No. 202511098438), Dec 2025.

## CERTIFICATIONS

---

- Cloud Computing with AWS — Internshala, Oct 2023
- Building Static and Responsive Websites — NXT Wave 4.0 Technologies, Jun 2023
- Presentation Skills — TCS iON, Nov 2022

## EDUCATION

---

**M.Tech, Artificial Intelligence & Machine Learning** — *Lovely Professional University, Punjab, India* **Since Aug 2024**

*CGPA: 7.7*

**B.Tech, Electrical & Electronics Engineering** — *Sri Vasavi Engineering College, Tadepalligudem, AP* **Jun 2020 – Mar 2024**

*CGPA: 8.0*

## ACHIEVEMENTS

---

- Led a team of 4 to develop a pneumonia detection model.
- Completed AWS Cloud Computing certification in under 2 months.
